

Ideal for minimizing chemical odors

PLAY OFF™

Masking Agent

- Reduces detection of chemical spray operations
- Masks objectionable odors with a pleasant wintergreen aroma
- Safe and easy to use with any tank mix

Play Off™ is a concentrated fragrance designed to mask objectionable chemical odors. The odors associated with the application of some herbicides, insecticides and fungicides can be particularly unpleasant. Adding **Play Off™** to the tank mix will minimize the detection of these chemical odors.

- Pleasant wintergreen fragrance
- Safe to add to any tank mix
 - Will not affect chemical efficacy of active ingredients
 - Will not injure sensitive turf, ornamentals or other plants

Available In:
Quarts

IDEAL FOR

- Masking offensive aromas associated with the use of chemicals in a range of agricultural, commercial, industrial and residential applications
- Mitigating applicator discomfort from overwhelming odors released during some pesticide spray operations
- Minimizing chemical odors associated with spray operations in public areas

HOW IT WORKS

Odorants are particles that cause chemical reactions with our olfactory receptors and this reaction defines our interpretation of good or bad smells. Furthermore, the offensive odors commonly found in many pesticides are magnified in spray operations as the odorant particles may be smaller and are airborne for a period of time. The process of chemical masking reduces the olfactory perception of unpleasant odors by presenting another, more pleasant odorant for our receptors to process.

- Contains essential oils distilled from the flowers, leaves, seeds, stems and roots of the wintergreen plant
- Includes couplers and selected surfactant emulsifiers to allow the scented oil to mix thoroughly with water and pesticides

HOW TO USE

- Spray with confidence after reducing the chance for cross contamination by cleaning equipment with **Onside Kick™**
- Add directly into the tank during the mixing process
- Start by adding **Play Off™** to the tank at lower rates and increase until the desired masking level is achieved

RECOMMENDED USE RATES

Liquid Chemicals	1 to 3 ounces per gallon of chemicals
Wettable Powder Chemicals	1 to 3 ounces per 4 pounds of chemicals

NOTE: Odor intensity will vary depending on the active ingredient being sprayed. Adjust use rates to meet the needs of the current operations.

QUALITY ASSURANCE

Exacto® products are manufactured with pride at our production facility in Sharon, Wisconsin. Each batch is inspected by our Quality Assurance Team to ensure it meets our high standards.
